

How to get dog to #4
from straight tunnel?
Where will he be after #3?
Which way to turn
after #5?

Deceptively simple.
Watch out for the
distances.

Exercise 2: obstacle discrimination
These are hard not only because of the
discrimination but because of the long,
straight tunnels. Plan carefully; you may
have to try layering to get to the right
spot in time to get him into the weaves.
