

Exercise 2
Find the tunnel entry

From Karen Holik, CR 12/06

If you go past jump #3 to signal the tunnel, your dog may go off course at the table or knock the bar at #5. If you stand where the figure is and send your dog—and he can find the tunnel entrance, you can front cross at the down contact of the A-frame and get the job done with a tight turn to #5. For more fun, try getting your dog to the A-frame instead of the tunnel.
