

Start with dog on left. Before he exits tunnel, Give Come command. As he exits, move laterally right & give jump command for #3. As he commits, give Come command, do front cross and finish with #4 on your right.

Distance challenge

Once dog is committed to #1, turn parallel to path you want him to take to #2, and give Jump command when he sees it. As he commits to #2, try calling Come and Tunnel. Once he's in the tunnel, face #4.

Got the other two?
Then try this for fun.
